

## Documentation – Simple Cookbook Recipe Program

### **1. Project Overview**

The Simple Cookbook Recipe Program is a small web project using HTML, CSS, and JavaScript.

It allows users to:

- View some preloaded recipes (Idli, Dosa, Chapati).
- Add new recipes with ingredients and steps.
- Search recipes by name.

### **2. Technologies Used**

- HTML → Structure of the webpage.
- CSS → Styling for layout and recipe cards.
- JavaScript → Adding, displaying, deleting

### **3. Features**

1. Preloaded recipes (Idli, Dosa, Chapati).
2. Add new recipes with a form.
3. Search the recipes by name
4. User-friendly interface with recipe cards.

### **4. Working**

1. Page loads with preloaded recipes.
2. User can add a recipe by entering details in the form.
3. New recipes are displayed instantly.
4. 3. Search the recipes by name.

## **5. Advantages**

- Simple and easy to use.
- Beginner-friendly for learning web development.
- Can be extended with more features like delete, edit, or images.
